Subject Index of Volume 78

Acetone
interaction of, with ammonia and alcohols over HZSM-5 zeolite
ethanol, 181
methanol, 43
Acetylenic compounds
hydration of, without using Hg, 31
Acrolein
hydrogenation on Group VIII metal catalysts; hydrogenation of α, β-unsaturated carbonyls, 211
Adenosine 2′ and 3′-phosphate
mutual isomerization of, by tris(3-aminopropyl) aminecobalt(III), L53
Adsorption states
spectroscopic studies on, of Fe pentacarbonyl absorbed on Ti dioxide, 287
Alcohols
effect of alkene structure on selectivity in oxidation of unsaturated, with Ti silicalite-1 catalyst, L41
Alkenes
liquid-phase hydrogenation of 1-alkenes over Rh/$AlPO_4$ and Rh/sepiolite catalysts, 249
oxygenation of, with phthalocyaninato Mn(III) and Fe(III) complexes and dioxygen, L9
Alkene structure
effect of, on selectivity in oxidation of unsaturated alcohols with Ti silicalite-1 catalyst, L41
Alkoxycarbonylation
one-step synthesis of esters by, of naturally occurring allylbenzenes, propenylbenzenes and monoterpenes, 351
Allylbenzenes
one-step synthesis of esters by alkoxycarbonylation of naturally occurring, propenylbenzenes and monoterpenes, 351
Allyl compounds
oxidation of, with *Methylosinus trichosporium* (OB3b), L27
Aluminum
liquid-phase hydrogenation of 1-alkenes over Rh/$AlPO_4$ and Rh/sepiolite catalysts, 249
Amines
selective reduction of aromatic nitro compounds affording aromatic, under CO/H_2O conditions catalyzed by phosphine-added Rh and Ru carbonyl complexes, 273
Ammonia
interaction of acetone with, and alcohols over HZSM-5 zeolite
ethanol, 181
methanol, 43
Aryl and alkenyl iodides
formylation of, by Pd–Ru bimetallic catalysts, 1
Autoxidation
of 2,6-di-t-butylphenol catalyzed by Co(II) complex of *N,N′*-ethylene-bis(salicylaldimine-5-sodium sulphonate) in aqueous medium, L1

Benzene
liquid-phase oxidation of, to phenol over supported Fe salts, 201
Benzyl alcohol derivatives
Pd-catalyzed carbonylation of, to phenylacetic acid derivatives, 131
Biomimetic oxidation
electroassisted, of hydrocarbons by molecular oxygen catalyzed by Mn porphyrin complexes intercalated into montmorillonite, L23
Boron
catalysis by Rh/B system; vapour-phase hydroformylation of ethylene at atmospheric pressure on Rh/B on silica, 339

Carbon monoxide
base-catalyzed decomposition of methyl formate to, and methanol over zeolite catalysts, 309
as building block in organic synthesis; one-step synthesis of esters by alkoxycarbonylation of naturally occurring allyl benzenes, propenylbenzenes and monoterpenes, 351

Carbonylation
Pd-catalyzed, of benzyl alcohol derivatives to phenylacetic acid derivatives, 131
Pd-catalyzed ring closure to naphthofuranoneacetic ester by selective, of diacetylenic precursors, 151
Carbonylation–decarboxylation
synthesis of γ-keto carboxylic acids from γ-keto-α-chloro carboxylic acids via, reactions catalyzed by Pd system, 121
Carbonyls
hydrogenation of α, β-unsaturated; acrolein hydrogenation on Group VIII metal catalysts, 211
Catalytic activity
of low-valent Cr supported on Y-zeolites, 57
reactions of dialkoxy–dinitrosyl–Mo complexes with R_xSiCl_{4-x}; of these systems, L15
Cellulose acetate
chemistry of Ru in; reactions with CO, H_2O_2, O_2 and H_2O, 189
Chromium
catalytic activity of low-valent Cr supported on Y-zeolites, 57
selectivity improvement in aromatization of isophorone on C-covered alumina supported K_2O–Cr_2O_3 catalyst, L19
α-Chymotrypsin
structure–activity relationship in hydrolysis of *N*-benzoylphenylalanine esters catalyzed by, 91
Cinnamaldehyde hydrogenation
dual catalytic chemistry of Fe–Rh/Grafoil catalysts, 295
selective hydrogenation of cinnamaldehyde over Ru–Sn catalysts, 227
Cobalt
autoxidation of 2,6-di-t-butylphenol catalyzed by Co(II) complex of *N*,*N*′-ethylenebis(salicylaldimine-5-sodium sulphonate) in aqueous medium, L1
mutual isomerization of adenosine 2′- and 3′-phosphate by tris(3-aminopropyl)aminecobalt(III), L53

Diacetylenic precursors
Pd-catalyzed ring closure to naphthofuranoneacetic ester by selective carbonylation of, 151

Dialkoxy–dinitrosyl–Mo complexes
reactions of, with R_xSiCl_{4-x}; catalytic activity of these systems, L15
2,6-Di-t-butylphenol
autoxidation of, catalyzed by Co(III) complex of *N*,*N*′-ethylenebis(salicylaldimine-5-sodium sulphonate) in aqueous medium, L1

Electrochemical oxidation
of organic substrates mediated by high-valent ruthenyl species, 263
Esters
one-step synthesis of, by alkoxycarbonylation of naturally occurring allylbenzenes, propenylbenzenes and monoterpenes, 351
Pd-catalyzed ring closure to naphthofuranoneacetic ester by selective carbonylation of diacetylenic precursors, 151
structure–activity relationship in hydrolysis of *N*-benzoylphenylalanine, catalyzed by α-chemotrypsin, 91
Ethanol
interaction of acetone with ammonia and alcohols over HZSM-5 zeolite, 181
Ether
stereoselective reduction of dibenzo-18-crown-6 ether to dicyclohexyl-18-crown-6 ether, 257
Ethylene
catalysis by Rh/B system; vapour-phase hydroformylation of, at atmospheric pressure on Rh/B on silica, 339

Formylation
of aryl and alkenyl iodides by Pd–Ru bimetallic catalysts, 1

Glutathione
influence of reduced glutathione (GSH) and metal ions on soluble and immobilized cabbage peroxidase, 113
Group VIII metal catalysts
acrolein hydrogenation on; hydrogenation of α,β-unsaturated carbonyls, 211

H_2–D_2 exchange reaction
induced by interaction of Nb monomers with SiO_2 surface and origins of catalytic activity studied by DV–Xα cluster calculation, 327

Heptadecane
evidence for hypocage catalysis in FAU/EMT zeolites derived from isomerisation and hydrocracking of, L47
Heterogeneous catalysts
positron annihilation spectroscopy in, 67
Homogeneous multimetallic catalysts
formylation of aryl and alkenyl iodides by Pd–Ru bimetallic catalysts, 1
Hydration
of acetylenic compounds without using Hg, 31
Hydrobenzoin
oxidation of *meso* and d,l-, by peroxomolybdenum complexes; mechanistic investigation, 159
Hydrocarbons
electroassisted biomimetic oxidation of, by molecular oxygen catalyzed by Mn porphyrin complexes intercalated into montmorillonite, L23
Hydrocracking
evidence for hypocage catalysis in FAU/EMT zeolites derived from isomerisation and, of heptadecane, L47
Hydroformylation
catalysis by Rh/B system; vapour-phase, of ethylene at atmospheric pressure on Rh/B on silica, 339
solvent effects in, of 1-octene using $HRh(CO)(PPh_3)_3$; effect of PPh_3 addition on rate of reaction, L37
Hydrogenation
liquid-phase, of 1-alkenes over Rh/$AlPO_4$ and Rh/sepiolite catalysts, 249
propene, with Pt–Ag intermetallic phases supported on SiO_2 gels, 169
selective, of cinnamaldehyde over Ru–Sn catalysts, 227
of α,β-unsaturated carbonyls; acrolein hydrogenation on Group VIII metal catalysts, 211
Hydrolysis
determination of rates of formation and, of Schiff bases formed by pyridoxal 5′-phosphate and copolypeptides containing D-lysine, 379
structure–activity relationship in, of *N*-benzoylphenylalanine esters catalyzed by α-chymotrypsin, 91
Hypocage catalysis
evidence for, in FAU/EMT zeolites derived from isomerisation and hydrocracking of heptadecane, L47

Iron
cinnamaldehyde hydrogenation; dual catalytic chemistry of Fe–Rh/Grafoil catalysts, 295
oxygenation of alkenes with phthalocyaninato Mn(III) and Fe(III) complexes and dioxygen, L9
spectroscopic studies on adsorption states of Fe pentacarbonyl absorbed on Ti dioxide, 287
Isomerization
evidence for hypocage catalysis in FAU/EMT zeolites derived from, and hydrocracking of heptadecane, L47
mutual, of adenosine 2′- and 3′-phosphate by tris(3-aminopropyl)aminocobalt(III), L53
of olefins catalyzed by Cp_2TiCl_2/Mg, L31
Isophorone
selectivity improvement in aromatization of, on C-covered alumina supported K_2O–Cr_2O_3 catalyst, L19
Isoprene
addition of alcohols to, catalyzed by hydrated Rh trichloride; way to improve 1,4-addition regioselectivity, 21

γ-Keto carboxylic acids
synthesis of, from γ-keto-α-chloro carboxylic acids via carbonylation–decarboxylation reactions catalyzed by Pd system, 121

Lignin model compounds
oxidation of, in water with dioxygen and hydrogen peroxide catalyzed by metallophthalocyanines, 367
L-Lysine
determination of rates of formation and hydrolysis of Schiff bases formed by pyridoxal 5′-phosphate and copolypeptides containing, 379

Magnesium
isomerization of olefins catalyzed by Cp_2TiCl_2/Mg, L31
Mandelic acid derivatives
influence of reaction parameters on Pd–HCl catalyzed synthesis of

phenylacetic acid derivatives via reduction of, with CO, 9
Manganese
electroassisted biomimetic oxidation of hydrocarbons by molecular oxygen catalyzed by Mn porphyrin complexes intercalated into montmorillonite, L23
oxygenation of alkenes with phthalocyaninato Mn(III) and Fe(III) complexes and dioxygen, L9
Metallophthalocyanines
oxidation of lignin model compounds in water with dioxygen and hydrogen peroxide catalyzed by, 367
Methanol
base-catalyzed decomposition of methyl formate to carbon monoxide and, over zeolite catalysts, 309
interaction of acetone with ammonia and alcohols over HZSM-5 zeolite, 43
Methoxybenzenes
synthesis of, from phenols and methyl formate via catalytic O-alkylation, 283
Methyl formate
base-catalyzed decomposition of, to carbon monoxide and methanol over zeolite catalysts, 309
synthesis of methoxybenzenes from phenols and, via catalytic O-alkylation, 283
Methylosinus trichosporium (OB3b)
oxidation of allyl compounds with, L27
Molybdenum
oxidation of *meso*- and *d,l*-hydrobenzoin by peroxomolybdenum complexes; mechanistic investigation, 159
reaction of dialkoxy–dinitrosyl–Mo complexes with R_xSiCl_{4-x}; catalytic activity of these systems, L15
Monoterpenes
one-step synthesis of esters by alkoxycarbonylation of naturally occurring allylbenzenes, propenylbenzenes and, 351
Montmorillonite
electroassisted biomimetic oxidation of hydrocarbons by molecular oxygen catalyzed by Mn porphyrin complexes intercalated into montmorillonite, L23
Niobium
H_2–D_2 exchange reaction induced by interaction of Nb monomers with SiO_2 surface and origins of catalytic activity studied by DV–Xα cluster calculation, 327

Octene
solvent effects of hydroformylation of 1-octene using $HRh(CO)(PPh_3)_3$; effect of PPh_3 addition on rate of reaction, L37
Olefins
isomerization of, catalyzed by Cp_2TiCl_2/Mg, L31
Organic substrates
electrochemical oxidation of, mediated by high-valent ruthenyl species, 263
Oxidation
of allyl compounds with *Methylosinus trichosporium* (OB3b), L27
of *meso*- and *d,l*-hydrobenzoin by peroxomolybdenum complexes; mechanistic investigation, 159
of lignin model compounds in water with dioxygen and hydrogen peroxide catalyzed by metallophthalocyanines, 367
liquid-phase, of benzene to phenol over supported Fe salts, 201
Oxygenation
of alkenes with phthalocyaninato Mn(III) and Fe(III) complexes and dioxygen, L9

Palladium
-catalyzed carbonylation of benzyl alcohol derivatives to phenylacetic acid derivatives, 131
-catalyzed ring closure to naphthofuranoneacetic ester by selective carbonylation of diacetylenic precursors, 151
formylation of aryl and alkenyl iodides by Pd–Ru bimetallic catalysts, 1
influence of reaction parameters on Pd–HCl catalyzed synthesis of phenylacetic acid derivatives via reduction of mandelic acid derivatives with CO, 9
synthesis of γ-keto carboxylic acids from γ-keto-α-chloro carboxylic acids via carbonylation–decarboxylation reactions catalyzed by Pd system, 121

Peroxidase
influence of reduced glutathione (GSH) and metal ions on soluble and immobilized cabbage, 113
Peroxides
reactivity of metal-bound; alkali triperoxovanadate(V) trihydrates, $A[V(O_2)_3]\cdot 3H_2O$ (A = Na or K), as oxidants resembling alkali–H_2O_2 reagent for some organic substrates, 143
Phenols
liquid-phase oxidation of benzene to, over supported Fe salts, 201
synthesis of methoxybenzenes from, and methyl formate via catalytic O-alkylation, 283
Phenylacetic acid derivatives
influence of reaction parameters on Pd–HCl catalyzed synthesis of, via reduction of mandelic acid derivatives with CO, 9
Pd-catalyzed carbonylation of benzyl alcohol derivatives to, 131
Platinum
propene hydrogenation with Pt–Ag intermetallic phases supported on SiO_2 gels, 169
Positron annihilation spectroscopy
in heterogeneous catalysis, 67
Potassium
reactivity of metal-bound peroxides; alkali triperoxovanadate(V) trihydrates, $A[V(O_2)_3]\cdot 3H_2O$ (A = Na or K), as oxidants resembling alkali–H_2O_2 reagent for some organic substrates, 143
selectivity improvement in aromatization of isophorone on C-covered alumina supported K_2O–Cr_2O_3 catalyst, L19
Propene
hydrogenation with Pt–Ag intermetallic phases supported on SiO_2 gels, 169
Propenylbenzenes
one-step synthesis of esters by alkoxycarbonylation of naturally occurring allylbenzenes, and monoterpenes, 351
Pyridoxal 5′-phosphate
determination of rates of formation and hydrolysis of Schiff bases formed by, and copolypeptides containing L-lysine, 379
Reaction parameters
influence of, on Pd–HCl catalyzed synthesis of phenylacetic acid derivatives via reduction of mandelic acid derivatives with CO, 9
Reduction
selective, of aromatic nitro compounds affording aromatic amines under CO/H_2O conditions catalyzed by phosphine-added Rh and Ru carbonyl complexes, 273
stereoselective, of dibenzo-18-crown-6 ether to dicyclohexyl-18-crown-6 ether, 257
Regioselectivity
addition of alcohols to isoprene catalyzed by hydrated Rh trichloride; way to improve 1,4-addition, 21
control of, by cation-exchanged sulfonic acid resin catalysts, 237
Rhodium
addition of alcohols to isoprene catalyzed by hydrated Rh trichloride; way to improve 1,4-addition regioselectivity, 21
catalysis by Rh/B system; vapour-phase hydroformylation of ethylene at atmospheric pressure on Rh/B on silica, 339
cinnamaldehyde hydrogenation; dual catalytic chemistry of Fe–Rh/Grafoil catalysts, 295
liquid-phase hydrogenation of 1-alkenes over Rh/$AlPO_4$ and Rh/sepiolite catalysts, 249
selective reduction of aromatic nitro compounds affording aromatic amines under CO/H_2O conditions catalyzed by phosphine-added Rh and Ru carbonyl complexes, 273
solvent effects in hydroformylation of 1-octene using $HRh(CO)(PPh_3)_3$; effect of PPh_3 addition on rate of reaction, L37
Ring closure
Pd-catalyzed, to naphthafuranoneacetic ester by selective carbonylation of diacetylenic precursors, 151
Ruthenium
chemistry of Ru in cellulose acetate; reactions with CO, H_2, O_2 and H_2O, 189

electrochemical oxidation of organic substrates mediated by high-valent ruthenyl species, 263
formylation of aryl and alkyl iodides by Pd–Ru bimetallic catalysts, 1
selective hydrogenation of cinnamaldehyde over Ru–Sn catalysts, 227
selective reduction of aromatic nitro compounds affording aromatic amines under CO/H_2O conditions catalyzed by phosphine-added Rh and Ru carbonyl complexes, 273

Schiff bases
determination of rates of formation and hydrolysis of, formed by pyridoxal 5′-phosphate and copolypeptides containing L-lysine, 379
Sepiolite
liquid-phase hydrogenation of 1-alkenes over $Rh/AlPO_4$ and Rh/sepiolite catalysts, 249
Silicon
H_2–D_2 exchange reaction induced by interaction of Nb monomers with SiO_2 surface and origins of catalytic activity studied by DV–Xα cluster calculation, 327
reactions of dialkoxy–dinitrosyl–Mo complexes with R_xSiCl_{4-x}; catalytic activity of these systems, L15
Silver
propene hydrogenation with Pt–Ag intermetallic phases supported on SiO_2 gels, 169
Sodium
reactivity of metal-bound peroxides; alkali triperoxovanadate(V) trihydrates, $A[V(O_2)_3]\cdot 3H_2O$ (A = Na or K), as oxidants resembling alkali–H_2O_2 reagent for some organic substrates, 143
Solvent effects
in hydroformylation of 1-octene using $HRh(CO)(PPh_3)_3$; effect of PPh_3 addition on rate of reaction, L37
Spectroscopic studies
on adsorption states of Fe pentacarbonyl absorbed on Ti dioxide, 287
Structure–activity relationship
in hydrolysis of *N*-benzoylphenylalanine esters catalyzed by α-chymotrypsin, 91
Sulfonic acid resin catalysts
control of regioselectivity by cation-exchanged, 237

Tin
selective hydrogenation of cinnamaldehyde over Ru–Sn catalysts, 227
Titanium
effect of alkene structure on selectivity in oxidation of unsaturated alcohols with Ti silicalite-1 catalyst, L41
isomerization of olefins catalyzed by Cp_2TiCl_2/Mg, L31
spectroscopic studies on adsorption states of Fe pentacarbonyl absorbed on Ti dioxide, 287

Vanadium
reactivity of metal-bound peroxides; alkali triperoxovanadate(V) trihydrates, $A[V(O_2)_3]\cdot 3H_2O$ (A = Na or K), as oxidants resembling alkali–H_2O_2 reagent for some organic substrates, 143

Zeolite
base-catalyzed decomposition of methyl formate to carbon monoxide and methanol over, catalysts, 309
catalytic activity of low-valent Cr supported on Y-, 57
FAU/EMT, evidence for hypocage catalysis in, derived from isomerisation and hydrocracking of heptadecane, L47
interaction of acetone with ammonia and alcohols over HZSM-5
ethanol, 181
methanol, 43
